This handout is a printout of an actual Zenmap report. It is used with the course project.

Source: Nmap Report
The Nmap Output tab displays Nmap terminal output, which includes open and closed ports.
Zenmap Ports / Hosts Tab

The Ports/Hosts tab displays either interesting ports on the selected host as shown or all the hosts which have a specific port open or filtered.
Zenmap Topology Tab

The Topology tab displays connections between hosts in a network; each ring represents a network hop from the center node.
Zenmap Host Details Tab

The Host Details tab displays details about the selected host, such as numbers of open and closed posts, Internet protocol (IP) address.
